

NOTICE OF A REMEDIAL ACTION PLAN

**Shell Service Station
128 Turnpike Road
Westboro, Massachusetts
RTN 2-0733
Tier 1C Permit No. W028756**

A Remedial Action Plan (310 CMR 40.0861) has been developed for this site pursuant to the Massachusetts Contingency Plan (310 CMR 40.1406). This disposal site was classified as Tier 1C on July 8, 2002, and granted a Waste Site Cleanup Permit on October 24, 2002.

The Remedial Action Plan proposes the following measures to respond to a release of oil and/or hazardous material at this disposal site:

- ♦ The remedial action alternative selected for implementation at this site will be monitored natural attenuation and enhanced bioremediation if required after continued evaluation of the effectiveness of MNA at the facility.
- ♦ EPA BIOSCREEN and MANN-Kendall Modeling indicates that the dissolved phase plume is stable and natural attenuation of the plume is occurring at a rate equivalent to groundwater flow. Additional modeling of the plume will be necessary to determine what enhanced bioremediation is necessary to further increase natural attenuation at the site.

M.G.L. c. 21E and the Massachusetts Contingency Plan provide additional opportunities for public involvement in decisions regarding response actions at disposal sites: 1) The Chief Municipal Official and Board of Health of the community in which the site is located will be notified of major milestones and events, pursuant to 310 CMR 40.1403; and 2) Upon receipt of a petition from ten or more residents of the municipality in which the disposal site is located, or of a municipality potentially affected by a disposal site, a plan for involving the public in decisions regarding response actions at the site will be prepared and implemented, pursuant to 310 CMR 40.1405.

To obtain more information on this disposal site and the opportunities for public involvement during its remediation, please contact Ms. Marjorie Hong, Shell Oil Products US, 308 East 38th Street, New York, NY 10016 at (212) 661-2506.
